

Many congratulations to members of the newly established Beeston Community Resource Steering Group and their supporters for their vision and determination to try and keep Middle Street open for community use on a sound financial footing.

I was newly elected in May 2013, but am well aware of the difficult journey the centre and its service users have endured, not to mention the difficulties in physically accessing the building during the tram construction.

I am working hard with officers and members at Nottinghamshire County Council during a period of unprecedented cuts by central government to try to keep the centre open for use by local people; I have listened to very many of you and can see how much you all value it.

I very much hope there is going to be a long term future for the Centre as a community resource; I will continue to do my very best to support.
